About Me

Fresh Graduate Associate Cyber Security from CEP-CCIT Universitas Indonesia with expertise in network security, system administration, and data protection. Engage in router configuration, network lintas analysis, and enhance the operational information security process. Additionally, expertise in digital forensic analysis, penetration testing, and the use of SIEM and IDS/IPS for monitoring and intrusion detection. possessing a strong interest in the fields of information technology development, system administration, Cyber Security, and other related fields.

EDUCATION

Universitas Trilogi — **Jakarta Selatan, Jakarta**
Bachelor (S1) Information Technology (Employee Class Program) — Sep 2025 - Ongoing

CEP-CCIT Faculty of Engineering, University of Indonesia — **Kota Depok, JAWA BARAT**
Associate (D.NIIT/D3) Cyber Security | GPA : 3,44/4,00 — Sep 2023 - November 2025

SMPIT - SMAIT AL-IZZAH BOARDING SCHOOL SERANG — **Kota Serang, Banten**
School Science — Jul 2017 - April 2023

EXPERIENCES

MEMORA | Contract | On-Site — **Dec 2025 – March 2026**
Data Analyst - Data Analyst – Traffic & Performance Monitoring

- Monitored marketplace traffic and sales performance metrics to identify trends and operational insights.
- Collected, cleaned, and analyzed large datasets related to user activity, transactions, and product performance.
- Created periodic reports and dashboards to support business performance evaluation and decision-making.
- Conducted data validation and anomaly detection to ensure operational data accuracy and consistency.
- Collaborated with operations and marketing teams to evaluate campaign effectiveness and traffic behavior.
- Performed performance tracking and comparative analysis to improve marketplace operational efficiency.

PT Krakatau Sarana Properti | Internship | On-Site **June 2025 – Aug 2025**
Security Operations Center Analyst Internship

- Designing and simulating network security tools for servers and endpoints using SIEM solutions.
- Analyzing activity logs (network traffic, firewall, IDS/IPS, endpoint) to detect anomalies and potential attacks.
- Supporting security incident investigations by collecting, correlating, and documenting digital evidence.
- Collaborating with the IT team in responding to incidents and performing initial mitigation actions.
- Conducting basic research on the latest cyber threat trends to enhance detection effectiveness.

Partai Persatuan Pembangunan | Contract | Hybird **Oct 2023 – Feb 2024**
Junior Data Analyst

- Collecting data meticulously from various sources to ensure data accuracy.
- Managing and cleaning data within spreadsheets to facilitate effective analysis.
- Analyzing data using Excel features such as **pivot tables, formulas, and charts**.
- Generating reports based on analytical findings to support decision-making processes.
- Collaborating with colleagues to understand their data requirements and provide relevant solutions.
- Continuously enhancing Excel skills through self-learning and hands-on practice.

CERTIFICATIONS

SkillFront **Online, Jakarta**
ISO/IEC 27001:2022 INFORMATION SECURITY ASSOCIATE May 2026

- Learned the principles and framework of ISO/IEC 27001:2022 for Information Security Management Systems (ISMS).
- Studied information security risk management, security controls, and compliance implementation based on ISO standards.
- Understood the process of identifying, assessing, and mitigating information security risks within organizations.

Cisco **Offline, Depok**
CyberOps Associate Sept 2024 - Jan 2025

- **Designed and simulated network security tools** for servers and endpoints using SIEM solutions (Security Onion, Kibana, Sguil).
- **Analyzed activity logs** (network traffic, firewall, IDS/IPS, endpoints) to detect anomalies and identify malicious activity, including Trickbot Trojan infections.
- **Investigated security incidents** by collecting, correlating, and documenting digital evidence (IP addresses, malicious domains, SHA256 file hashes, and suspicious payloads).
- **Collaborated with IT and security workflows** to provide incident response and initial mitigation recommendations.
- **Conducted research on emerging cyber threats** and validated malicious files through VirusTotal to improve detection effectiveness.

Dicoding **Online, Jakarta**
Belajar Dasar Visualisasi Data November 2023

- Learned foundational concepts of data visualization.
- Developed a final project involving interactive data display.
- Practiced data manipulation and presentation techniques.
- Gained understanding of synchronous and asynchronous data handling.

Udemy **Online, Jakarta**
Object Oriented Programming June 2024

- Studied the principles of object-oriented programming for backend development.

- Built a functional system applying modular and reusable code structure.
- Implemented data operations (CRUD) in a structured project.
- Practiced consuming and testing APIs with industry-standard tools.

CEP CCIT FTUI **Offline, Depok**
Cyber Security Fundamental July 2024
- Gained foundational knowledge of cybersecurity principles.
- Explored topics such as threat analysis, encryption, and secure systems.
- Hands-on introduction to cybersecurity tools and best practices.

CEP CCIT FTUI **Offline, Depok**
Penetration Testing Basic October 2024
- Learned the basics of ethical hacking and system vulnerability assessment.
- Practiced penetration testing phases: reconnaissance, scanning, exploitation, and reporting.
- Utilized common tools in cybersecurity testing environments.

DICODING **Online, Jakarta**
Belajar Dasa-dasar DevOps November 2024
- Studied DevOps culture and its role in modern software development.
- Explored automation practices, CI/CD pipelines, and collaboration workflows.
- Introduced to tools supporting DevOps implementation.

DICODING **Online, Jakarta**
Cloud Practitioner Essentials (Belajar Dasar AWS Clouds) January 2025
- Learned the core principles of cloud computing using AWS.
- Explored essential cloud services and architecture.
- Understood cloud security, scalability, and cost optimization fundamentals.

ADDITIONAL INFORMATION

Skills :

- **Technical skill**: Networking & Infrastructure, System Administration . Cybersecurity, Monitoring & Cloud Tools
- **Tools** : Linux, Windows Server , Cisco, Mikrotik, Wazuh, Suricata, Snort, VMWare, Proxmox, Docker, Github
- **Languages**: Indonesian, English (Intermediate).

Event Certifications :

- **Seminar Series CCIT-FTUI 2023** as Event Leader.
- **Open House Komandro CCIT-FTUI 2024 as** Documentation Staff
- **KomByte I CCIT-FTUI 2024** as Documentation Staff.
- **DevFest Depok 2024 with Sandika Galih** as Floorman Staff
